

JustOn Billing & Invoice Management

Billing, Invoicing, E-Invoicing in Salesforce

JustOn Billing & Invoice Management

DIGITAL BILLING AND INVOICING PROCESSES IN SALESFORCE

JustOn Billing & Invoice Management automates your billing processes, your invoice management and your accounts receivable in Salesforce.

The application enables you to monetize every business model: recurring subscriptions, usage-based pricing models, commissions, and one-time payments for products and services.

The app is particularly well suited for medium-sized companies that want to manage 100 or more invoices or payment transactions per month.

BUSINESS MODEL MAPPING

In JustOn Billing & Invoice Management, you can configure every contract and pricing model. Our billing software retrieves all relevant data from your backend systems as the basis for the invoice and e-invoice generation.

INVOICE GENERATION

Our application completely automates the digital invoice process. JustOn Billing & Invoice Management prepares the invoice data, generates, distributes, and archives your invoices and e-invoices.

ACCOUNTS RECEIVABLE

JustOn Billing & Invoice Management supports your accounts receivable management. Our software registers all customer payments, manages credits, reminders, and receivables.

ANALYTICS & REPORTS

Our software evaluates your data. It provides real-time overviews on your finances and KPIs like MRR, yearly revenue, cash-flow and customer churn rate.

JustOn Billing & Invoice Management

TAX COMPLIANCE IN THE EU, UK AND THE USA

JustOn Billing & Invoice Management automatically calculates national and international tax rates and checks the VAT identification numbers for cross-border transactions in the EU. The software works in compliance with the following tax requirements:

- the GoB and GoBD in Germany (IDW PS 880)
- the French standard NF Logiciel (NF203)
- the international standard ISO/IEC 25051:2014.

100% SALESFORCE INTEGRATION

JustOn Billing & Invoice Management is natively built on Salesforce and seamlessly integrable. You work in your familiar Salesforce user interface and benefit from the security and other advantages of the Salesforce Platform.

The App retrieves all relevant data from Salesforce CRM, ERP- or transaction management systems and generates automatically invoices, e-invoices and reminders.

For information on integration infrastructure, user-defined and standard objects, refer to our [technical documentation](#).

SALESFORCE ISV APPS

The app integrates directly with all major Salesforce AppExchange ISV apps – including [JustOn Cash Management](#), [JustOn Connector for DATEV](#), [JustOn SCHUFA Inquiries](#), Salesforce CPQ & Billing and Salesforce Order Management.
